

Monday 19th June

Time	Abstract Number	Title	Presenting Author	Organisation/Institution	Country
08:00					
Registration Opens Location: Hall 2B					

09:00 - 10:45					
Special Session: UKKW 2017 Opening; AKI Session including ISN talk by John Feehally Location: Hall 1					

09:00 - 10:45		AKI and Global Kidney Health	Professor John Feehally	University Hospitals Leicester	United Kingdom
		Improving AKI Care in Malawi	Rhys Evans	University College London	United Kingdom
		AKI and the Promise of Regenerative Medicine	Dr Sanjeev Kumar	Regenerative Medicine Institute, Cedars Sinai Medical Center	USA
		Novel Insights into Immune-Mediated AKI	Meena Clatworthy	University of Cambridge and Addenbrookes Hospital	United Kingdom
		AKI as a cause of CKD: What is the scale of the problem and what can we do about it?	Dr Nick Selby	University of Nottingham and Royal Derby Hospital	United Kingdom

10:45 - 11:15					
Morning Coffee Break / Exhibition Location: Hall 2B					

11:15 - 12:45					
Parallel Session: 3 Minute Heroes Chairs: Location: Hall 1A					

11:15 - 12:45		Title - TBC	Richard Coward	University of Bristol	United Kingdom
		Increasing insulin receptor number protects podocytes from ER stress	Dr Kathryn Garner	University of Bristol	United Kingdom
		New therapeutic targets in proteinase-3 induced granuloma formation in granulomatosis with polyangiitis	Dr Scott Henderson	University College London	United Kingdom
		Podocyte glycogen synthase kinase 3 (GSK3) is an evolutionarily conserved master regulator of glomerular/excretory function controlling podocyte differentiation and cell cycling	Dr Jenny Hurcombe	University of Bristol	United Kingdom
		microRNA Regulation of Macrophage Phenotype in Peritoneal Fibrosis	Dr Robert Jenkins	Cardiff University	United Kingdom
		Th17 Cells and Podocyte Crosstalk	Carl May	University of Bristol	United Kingdom
		Connective Tissue Growth Factor (CTGF) is a Critical Mediator of Cryoglobulinaemic Vasculitis (CV) and a novel target for therapy	Dr Gayathri Rajakaruna	University College London	United Kingdom
		Human kidney-derived cells ameliorate acute kidney injury without engrafting into renal tissue	Dr Ilaria Santeramo	University of Liverpool	United Kingdom
		Human Urine Derived Renal Tubular Epithelial Cells (HURECs) reveal a novel ciliary phenotype for CEP290 ciliopathies and serve as readout for identification of novel therapies for nephronophthisis	Dr Shalabh Srivastava	Newcastle University	United Kingdom
		Systemic administration of stem cells via the left heart ventricle enables their efficient delivery to the kidneys	Dr Arthur Taylor	University of Liverpool	United Kingdom
		Proof that mesothelial cells directly contribute to peritoneal scars in vivo	Dr Thomas Wilm	University of Liverpool	United Kingdom
		MicroRNA-200c Inhibits TGF-β1-induced Epithelial-to-mesenchymal Transition and Fibrogenesis in Human Peritoneal Mesothelial Cells	Dr Susan Yung	The University of Hong Kong	Hong Kong

11:15 - 12:45					
Parallel Session: CKD Chairs: Location: Hall 1B					

11:15 - 12:45		Evolving anti-fibrotic therapies in Chronic Kidney Disease	Professor Donald Fraser	University Hospital of Wales	United Kingdom
		SGLT-2 Inhibitors as potential renal protective therapy?	Professor David Wheeler	University College London	United Kingdom
		Urinary endotrophin is associated with CKD progression at 12 months: a prospective observational study	Dr Anthony Fenton	University Hospitals Birmingham NHS Foundation Trust	United Kingdom
		Multiparametric Magnetic Resonance Imaging Assessment of Chronic Kidney Disease	Dr Huda Mahmoud	Centre for Kidney Research and Innovation	United Kingdom
		Mesenchymal Stromal Cells for Diabetic Kidney Disease: Bench to Bedside	Professor Timothy O'Brien	Regenerative Medicine Institute (REMEDI)	Republic of Ireland

11:15 - 12:45					
Parallel Session: Comparative Veterinary Nephrology Chairs: Location: Hall 1C					

11:15 - 12:45		What do we know about normal renal function in dogs and cats?	Professor Scott Brown	University of Georgia	USA
		Renal disease in cats and dogs	Professor Hattie Syme	Royal Veterinary College	United Kingdom
		Clinical issues and opportunities confronting both veterinary and human nephrology	Professor Jonathan Elliot	Royal Veterinary College	United Kingdom
		Clinical issues and opportunities confronting both veterinary and human nephrology	Dr Thomas Hiemstra	University of Cambridge	United Kingdom

12:45 - 14:15					
Lunch Break / Exhibition Location: Hall 5					

12:45 - 14:15					
Afternoon Corporate Session with Vifor Fresenius Location:					

12:45 - 14:15					
Afternoon Corporate Session with Otsuka Pharmaceuticals Location:					

14:15 - 15:15	Moderated Poster Session Chair: Location: Hall 2B
---------------	------------------------------------------------------------------------------

15:15 - 15:45	Afternoon Coffee Break / Exhibition Location: Hall 2B
---------------	------------------------------------------------------------------------

15:45 - 17:30	Parallel Session: 21st Century Communications Chairs: Location: Hall 1A			
15:45 - 17:30	The Healthcare in Social Media Report: A multi-media social network and communication project	Richard McCrory		
	Clinical trial and research communication in the 21st Century: A strategy in partnership with Kidney Research UK	Tom Oates	NephJC	United Kingdom
	The Renal Fellow Network: A renal education blog for fellows, by fellows	Paul Phelan	Royal Infirmary of Edinburgh	United Kingdom
	Patient use of social networks for information and peer support	Robert Finnigan	British Kidney Patient Association	United Kingdom
	The use of Social Media to identify and respond to unmet patient needs	Cristina Vasilica		

15:45 - 17:30	Parallel Session: Basic Science Chairs: Location: Hall 1B			
15:45 - 17:30	Title - TBC	Dr Nick Selby	University of Nottingham	United Kingdom
	Gdf11 is induced in the murine and human kidney in response to injury, with experimental administration worsening fibrosis after unilateral ureteric obstruction.	Dr David Ferenbach	University of Edinburgh	United Kingdom
	Urinary trace elements as novel biomarkers of ischaemic acute kidney injury: Data from porcine model	Professor David Gardner	University of Nottingham	United Kingdom
	Title - TBC	Professor Donald Fraser	University Hospital of Wales	United Kingdom

15:45 - 17:30	Parallel Session: ESKD Chairs: Location: Hall 1C			
15:45 - 17:30	How can the registry improve outcomes for renal patients in the UK	Fergus Caskey		
	Can we control volume sufficiently in anuric patients?	Simon Davies		
	Tailoring HD prescriptions to improve outcomes	James Tattersall		
	Stroke in Haemodialysis (HD): Using National Datasets to determine incidence, Risk factors & Outcomes	Dr Mark Findlay	University of Glasgow	United Kingdom
	In-center nocturnal haemodialysis is associated with favourable cardiac remodeling and reduced levels of myocardial fibrosis: Results from the MIDNIGHT study, a non-randomised controlled trial	Dr Matthew Graham-Brown	University Hospitals Leicester	United Kingdom
	Associations between haemodialysis facility practices related to fluid volume management and intra-dialytic hypotension and adverse outcomes in the DOPPS	Dr Indranil Dasgupta	Heart of England NHS Foundation Trust	United Kingdom

17:30 - 18:00	Special Session: Summary of the Day Location: Hall 1A
---------------	------------------------------------------------------------------------

18:30 - 19:30	Kidney Research UK Hosted Fun Run Please note registration commences at 18:00
---------------	------------------------------------------------------------------------------------------------

19:00 - 21:00	Renal Association Presidential Address Location: Hall 2B
---------------	---------------------------------------------------------------------------

Tuesday 20th June

Time	Abstract Number	Title	Presenting Author	Organisation/Institution	Country
07:00 Registration Opens Location: Hall 2B					
07:45 - 08:45 Morning Corporate Session with Kidney Research UK and National Institute for Health Research Location:					
07:45 - 08:45 Morning Corporate Session with Location:					
09:00 - 10:45 Parallel Session: CKD inc ISN talk by Adeera Levin Chairs: Location: Hall 1A					
09:00 - 10:45		Opportunities and challenges to improve outcomes in CKD around the world	Professor Adeera Levin	University of British Columbia	Canada
		The effects a of 12-week supervised aerobic or combined exercise programme on muscle size, strength, and physical performance in non-dialysis CKD patients	Douglas Gould	University of Leicester	United Kingdom
		Coding for Chronic Kidney Disease: risk factors, audit-related improvement, and patient management. Results from the National Chronic Kidney Disease Audit	Dr Lois Kim	London School of Hygiene and Tropical Medicine	United Kingdom
		Blood Pressure Targets in CKD: Did SPRINT give us the answers or are we still on a marathon to find them?	Richard Haynes	Nuffield Department of Population Health	United Kingdom
		NURTuRE CKD: a national bio-clinical cohort study	Professor Maarten Taal	University of Nottingham	United Kingdom
09:00 - 10:45 Parallel Session: General Nephrology Chairs: Location: Hall 1B					
09:00 - 10:45		Title - TBC	Clara Day		
		Title - TBC	Fiona Loud	British Kidney Patient Association	United Kingdom
		UKRRS which arose from ambition 15 of the above	Professor John Feehally	University Hospitals Leicester	United Kingdom
		Iron deficiency and the Heart in CKD - Beyond Haemoglobin	Professor Sunil Bhandari	Hull York Medical School	United Kingdom
09:00 - 10:45 Parallel Session: Research Masterclass Chairs: Location: Hall 1C					
09:00 - 10:45		So you want to become involved in clinical research, but don't have time to do it	Iain Macdougall	King's College Hospital NHS Foundation Trust	United Kingdom
		The story of cholesterol-lowering in CKD: from hypothesis to meta-analysis	Colin Baigent	University of Oxford	United Kingdom
		I've got a hypothesis - how do I test it?	Dr Thomas Hiemstra	University of Cambridge	United Kingdom
10:45 - 11:15 Morning Coffee Break / Exhibition Location: Hall 2B					
11:15 - 12:45 Parallel Session: Glomerulonephritis Chairs: Location: Hall 1A					
11:15 - 12:45		IgA nephropathy – current concepts and knowledge	Dr Jonathan Barratt	Leicester General Hospital	United Kingdom
		Syk Inhibitors and IgA nephropathy	Professor Fred Tam	Imperial College	United Kingdom
		MicroRNA in IgA nephropathy and CKD – Novel Biomarkers and Targets	Dr Laura Denby	University of Edinburgh	United Kingdom
11:15 - 12:45 Parallel Session: Clinical Trials Chairs: Location: Hall 1B					
11:15 - 12:45		Current RCTs in UK nephrology	Professor Phil Kalra	Salford Royal Hospital NHS Foundation Trust	United Kingdom
		Using national registries to collect outcomes in trials	Fergus Caskey	University of Bristol	United Kingdom
		SGLT2i in CKD - what have we learnt from EMPA-REG	Paddy Mark	University of Glasgow	United Kingdom
		Which outcomes should we use in nephrology trials?	Will Herrington	University of Oxford	United Kingdom
11:15 - 12:45 Parallel Session: OOP Opportunities for Trainees Chairs: Location: Hall 1C					
11:15 - 12:45			Eoin McKinney	University of Cambridge	United Kingdom
			Amanda Newnham	Leeds Teaching Hospitals NHS Trust	United Kingdom
			Carolyn Amery		United Kingdom
12:45 - 14:15 Lunch Break / Exhibition Location: Hall 5					
12:45 - 14:15 Afternoon Corporate Session with Vifor Fresenius Location:					

12:45 - 14:15 Afternoon Corporate Session with Janssen, Pharmaceutical Companies of Johnson and Johnson
Location:

14:15 - 15:15 Moderated Poster Session
Chair:
Location: Hall 2B

14:45 - 15:45 Renal Association AGM
Location:

15:15 - 15:45 Afternoon Coffee Break / Exhibition
Location: Hall 2B

15:45 - 17:30				
Parallel Session: AKI				
Chairs:				
Location: Hall 1A				
15:45 - 17:30	Live imaging in AKI: novel insights into mechanisms of injury and repair	Andrew Hall	University of Zurich	Switzerland
	AKI and organ cross talk: Does AKI harm other organ systems?	Mark Devonald	Nottingham University Hospitals	United Kingdom
	Biomarkers in AKI: Where are we now?	Andrew Lewington	University of Leeds Teaching Hospitals	United Kingdom
	Sepsis-associated AKI: A global threat to kidney health?	Chris Laing	Royal Free Hospital/University College London	United Kingdom
	Acute kidney injury in elective surgery: reducing the incidence with pre-operative risk assessment and post-operative monitoring	Professor Dr Christopher Wong	Aintree University Hospital	United Kingdom
	Urinary trace elements as biomarkers of acute kidney injury after intensive care unit admission	Dr Jennifer Allen	Nottingham University Hospitals NHS Trust	United Kingdom

15:45 - 17:30				
Parallel Session: Young Investigator				
Chairs:				
Location: Hall 1B				
15:45 - 17:30	Evaluation of a cannabinoid receptor (CNRI) antagonist/ CNR2 agonist on podocyte markers in a mouse model of experimental diabetes	Dr Ruth Banks	University of Aberdeen	United Kingdom
	Identification of novel NUP93 mutations in SRNS and evidence for a functional role for this protein in the regulation of podocyte biology	Dr Agnieszka Bierzynska	University of Bristol	United Kingdom
	Development of a refined subtotal nephrectomy mouse model to study progressive renal disease	Dr Laura Denby	University of Edinburgh	United Kingdom
	Insect nephrocytes as a model for human podocyte ageing	Dr Paul Hartley	Bournemouth University	United Kingdom
	Title - TBC	Professor Karl Kadler	The University of Manchester	United Kingdom

15:45 - 17:30				
Parallel Session: KQuIP				
Chairs:				
Location: Hall 1C				
15:45 - 17:30	KQuIP Update	Graham Lipkin		
	Teaching QI through hands on experience; LTMD	Emma Vaux		
	Transplant First: addressing access to transplantation	Kerry Tomlinson		
	How to improve access to home Therapies or Getting Right First Time			
	Patient Led Research Hub for Renal Research: a Progress Report	Dr Thomas Hiemstra	University of Cambridge	United Kingdom
	Measuring Patient Activation and Quality of Life Outcomes - the experience of 10 renal units	Rachel Gair	UK Renal Registry	United Kingdom
	Outcome data for Nephrology day case procedure undertaken by Advanced Nurse Practitioner to reduce cost and length of stay	Andrew Stott	Royal Liverpool Broadgreen Hospital	United Kingdom
	Evaluation of a secondary care CKD email advice service for GPs in North West London	Dr Sameer Zaman	Imperial College London	United Kingdom

17:30 - 18:00 Special Session: Summary of the Day
Location: Hall 1A

18:00 - 19:00 SpR Club
Location: Hall 2B

19:30 - 23:59 Conference Dinner
Location: Royal Liver Building

Wednesday 21st June

Time	Abstract Number	Title	Presenting Author	Organisation/Institution	Country
07:00					
Registration Opens					
Location: Hall 2B					
09:00 - 10:45					
Parallel Session: Transplant					
Chairs:					
Location: Hall 1A					
09:00 - 10:45		Overview of living donation in the UK	Lisa Burnapp		
		Challenges facing living donation: Inequity of access	Diana Wu		
		Challenges facing living donation: Is it safe to be a living donor?	Rachel Hilton	Guy's and St Thomas' NHS Foundation Trust	United Kingdom
		Case based discussion around a HSP	Nicholas Torpey	Addenbrookes Hospital	United Kingdom
		How do we get living donation discussion up front? Transplant first-	Jen/Craig Lumsdaine		
		Will they donate? Predictors of non-donation and withdrawal in a UK multicentre prospective cohort study of potential living kidney donors	Dr Pippa Bailey	University of Bristol and North Bristol NHS Trust	United Kingdom
		Recipient Age is a Significant Factor in Immunological and Infective Complications Following Kidney Transplantation	Dr Rachel Hung	Royal Free Hospitals NHS Foundation Trust	United Kingdom
09:00 - 10:45					
Parallel Session: Renal Pharmacology					
Chairs:					
Location: Hall 1B					
09:00 - 10:45		Personalising the prescription in the 21st Century	Professor Sir Munir Primohamed	University of Liverpool	United Kingdom
		Nanomedicine: what should a Nephrologist know?	Dr Neill Liptrott	University of Liverpool	United Kingdom
		Pharmacokinetics and renal impairment: how can we get it right?	Professor Amin Rostami	University of Manchester	United Kingdom
		Screening for adrenal insufficiency prior to withdrawal of corticosteroid treatment for renal conditions: an audit cycle at a tertiary centre	Dr Alvin Karangizi	University Hospitals NHS Foundation Trust	United Kingdom
		A Phase-Two, Randomised, Placebo-Controlled Trial: Belimumab in Renal Transplantation Targets Naïve and Activated Memory B Cells Whilst Sparing Regulatory B Cells	Dr Gemma Banham	University of Cambridge	United Kingdom
09:00 - 10:45					
Parallel Session: Glomerulonephritis					
Chairs:					
Location: Hall 1C					
09:00 - 10:45		What is new in Membranous Nephropathy?	Professor Paul Brenchley	University of Manchester	United Kingdom
		Developing therapies for Vasculitis; from new targets to clinical studies	Professor Caroline Savage	GlaxoSmithKline	United Kingdom
		PLA2R positive Membranous Nephropathy associated with viral infection	Dr Aikaterini Nikolopoulou	Imperial College London	United Kingdom
		The Rituximab/Rescue regimen (Rituximab, Mycophenolate Mofetil & no increase in oral steroids) for lupus nephritis leads to sustained disease remission over years and steroid minimisation in patients on maintenance steroids at the time of renal flare.	Dr Camilla Pillay	Imperial College Healthcare NHS Trust	United Kingdom
		Rituximab is Highly Effective Treatment for Small Vessel Vasculitis in Absence of Circulating ANCA	Dr Leanne Ogden	NHS	United Kingdom
10:45 - 11:15					
Morning Coffee Break / Exhibition					
Location: Hall 2B					
11:15 - 12:45					
Parallel Session: ESKD inc ISN Debate					
Chairs:					
Location: Hall 1A					
11:15 - 12:45		Towards improving global access to ESKD care : Investing resources in dialysis is a distraction	Vivek Jha		India
		Quality of life in frail older people with end stage renal disease – How does dialysis compare with conservative kidney care?	Dr Osasuyi Iyasere	Leicester General Hospital	United Kingdom
		Peritoneal Inflammation Increases Over Time, with Subsequent Increases in Plasma IL-6: Results From the Global Fluid Study	Dr Emma Elphick	Keele University	United Kingdom
		Towards improving global access to ESKD care : Investing resources in dialysis is a distraction	Professor Dr W Van Bissen	Ghent University Hospital	Belgium
		Incentre dialysis in the face of austerity - how to get the best?	Clara Day		
11:15 - 12:45					
Parallel Session: Transplant					
Chairs:					
Location: Hall 1B					
11:15 - 12:45		Novel immunosuppressants: current and future?	Meena Clatworthy		
		Prevention of delayed graft function-current state of therapies	Lorna Marson	The University of Edinburgh	United Kingdom
		Cell therapies in transplant-science fiction or reality?	Giovanna Lombardi	King's College London	United Kingdom
		Clinical relevance of complement activating donor specific antibodies in highly sensitised patients: Two centre retrospective study	Dr Adarsh Babu	University Hospitals Coventry and Warwickshire	United Kingdom
		Risk of allograft thrombosis and Use of Thrombophilia screen in high risk Kidney Transplant Recipients (KTRs) -A Single Centre Experience	Dr Rajkumar Chinnadurai	Salford Royal NHS Foundation Trust	United Kingdom
11:15 - 12:45					
Parallel Session: Raine Award and Best Clinical Abstracts					
Chairs:					
Location: Hall 1C					

11:15 - 12:45	AEG Raine Award 2017	Edwin Wong	Newcastle University	United Kingdom
	Subclinical cytomegalovirus reactivation drives a reversible expansion of cytotoxic endothelial homing T-cells: a novel modifiable cardiovascular disease risk factor in patients with inflammatory renal disease	Dr Dimitrios Chanouzas	University of Birmingham	United Kingdom
	Cognitive function declines significantly over a single haemodialysis session	Dr Indranil Dasgupta	Heart of England NHS Foundation Trust	United Kingdom
	Diagnostic accuracy of biomarkers and imaging in predicting bone turnover in advanced chronic kidney disease	Dr Syazrah Salam	Sheffield Kidney Institute, Northern General Hospital	United Kingdom
	The Impact of Cystatin C Based Estimates of GFR on CKD Diagnosis in Primary Care	Dr Adam Shardlow	Royal Derby Hospital	United Kingdom
	Renal and Obstetric Outcomes of Pregnant Women with CKD 3-5	Dr Philip Webster	Imperial College London	United Kingdom

12:45 - 14:15	Lunch Break / Exhibition Location: Hall 5
---------------	-----------------------------------------------------

12:45 - 14:15	Afternoon Corporate Session with AbbVie Location:
---------------	-------------------------------------------------------------

14:15 - 15:15	Moderated Poster Session Chair: Location: Hall 2B
---------------	----------------------------------------------------------------

15:15 - 15:45	Afternoon Coffee Break / Exhibition Location: Hall 2B
---------------	-----------------------------------------------------------------

15:45 - 17:30	Parallel Session: Clinico-pathologic Cases Chairs: Location: Hall 1A			
15:45 - 17:30		Professor Jeremy Levy	Imperial College NHS Trust	United Kingdom
		Nicholas Torpey	Addenbrookes Hospital	United Kingdom
		Rachel Hilton	Guy's and St Thomas' NHS Foundation Trust	United Kingdom
		Elizabeth Wallin	Addenbrookes Hospital	United Kingdom
		Viyaasan Mahalingasivam	Guy's and St Thomas' NHS Foundation Trust	United Kingdom
		TBC		

15:45 - 17:30	Parallel Session: Paediatric Nephrology Chairs: Location: Hall 1B			
15:45 - 17:30	Clinical and basic science aspects of tubular disease	Professor Elena Levtchenko	University Hospitals Leuven	Belgium
	Rituximab and plasma exchange does not prevent disease recurrence in high risk FSGS following living donor transplantation	Dr Mohan Shenoy	Royal Manchester Children's Hospital	United Kingdom
	Clinical and basic science aspects of glomerular disease; a focus on insulin resistance	Prof Richard Coward	University of Bristol	United Kingdom
	A Retrospective Case Series 1996-2014 of Simple Renal Cysts in Children in a tertiary paediatric centre	Dr Sarah Roy	Alder Hey Children's Hospital	United Kingdom
	CERTAIN paediatric renal transplant registry	Professor Burkhard Tönshoff	Heidelberg University Hospital	Germany
	Improvement of patient and parent/carer experience through high quality information: Results of the infoKID evaluation	Dr Jan Dudley	Bristol Royal Hospital for Children	United Kingdom

15:45 - 17:30	Parallel Session: Regenerative Medicine Chairs: Location: Hall 1C			
15:45 - 17:30	Title TBC	Professor Ton Rabelink	Leiden University Medical Centre	Netherlands
	An overview of regenerative medicine therapies and their ability to ameliorate renal injury in rodents with kidney disease	Professor Trish Murray	University of Liverpool	United Kingdom
	Cell-based regenerative medicine therapies for improving the viability of extended criteria donor kidneys	Marc Clancy	NHS Greater Glasgow and Clyde	United Kingdom
	Generating mini-kidneys in vitro using stem cell technology	Professor Jamie Davies	University of Edinburgh	United Kingdom
	The potential of macrophage-based therapies for resolving inflammation and promoting renal regeneration	Professor Jeremy Hughes	University of Edinburgh	United Kingdom
	Inhibiting fibrosis and promoting renal regeneration in rodent models using antisense technology	Dr Claire Sharpe	King's College London	United Kingdom

17:30 - 18:00	Special Session: Summary of the Day Location: Hall 1A
---------------	-----------------------------------------------------------------
